Experience

Infinite Computer Solutions

Aug 2025 – Present

Associate Software Engineer

- Associate Software Engineer skilled in Java, Spring, Hibernate and automation testing. Experienced in API development, MySQL database management, debugging, testing and deployment. Delivered scalable applications and reliable releases.

Infinite Computer Solutions

Mar 2025 – Aug 2025

Associate Software Engineer Trainee

- Developed REST APIs using Java, Spring Boot, and Hibernate/JPA. Built CRUD features, optimized queries, contributed to Healthcare and E-Learning projects, fixed defects, and performed unit testing using JUnit and Mockito frameworks.

Skills

- Languages:** Java, HTML, JavaScript, CSS
- Frameworks:** Spring Boot, Hibernate, JSF, JPA
- Tools:** Functionize tool, Git, SQL, VS Code, Junit, PostgreSQL
- Platforms:** J2EE

Education

GITA AUTNOMOUS

Sep 2021 – May 2025

B.Tech in Computer Science and Engineering; *CGPA: 8.40*

Bhubaneswar

Projects

Medicaid Management Information System

Sep 2025 – Present

- Implemented CRs and resolved defects for a healthcare application, improving functionality, stability, and user experience. Supported automation testing with Functionize AI, contributing to efficient validation and application quality.

Tech Stack: HTML, CSS, JAVASCRIPT, JAVA, SPRING, HIBERNATE, POSTGRESQL, JSF, JSP.

Hospital Management System

Apr 2025 – Jul 2025

- Developed REST APIs using Spring Boot and PostgreSQL for efficient data management. Leveraged Spring Data JPA for CRUD operations and transactions, exposing RESTful endpoints to support accurate database updates and retrievals.

Tech Stack: SpringBoot, PostgreSQL, JPA, Java

Certificate

- Postman API Fundamentals
- Agile Project Management
- Java
- SQL

Achievements

- Contributed to both Java development and automation testing using Functionize AI.
- Implemented Authentication, OTP Verification, Password Reset, and User Management features for the MMIS Infinite healthcare application, strengthening application security and improving user access management.
- Executed and validated 80+ automated test cases using Functionize, achieving an 80% test accuracy rate and improving software quality
